ADMINISTRATIVE

184.00 BLOODBORNE PATHOGENS EXPOSURE CONTROL

The College recognizes that employees and students may be exposed to human blood and body fluids that could be infectious. The College shall maintain an Exposure Control Plan that complies with the Occupational Safety and Health Administration (OSHA) Bloodborne Pathogens Standard (29 CFR 1910.1030) and other applicable federal and state laws and regulations.

The Plan shall be accessible to all employees and shall be reviewed annually. All staff shall receive the training and equipment necessary to implement the plan.

The Exposure Control Plan shall establish the operational requirements necessary to minimize occupational exposure to bloodborne pathogens, including engineering controls, work practices, personal protective equipment, annual employee training, exposure response, recordkeeping, and other requirements necessary to maintain a safe work environment.

Policy 184 is implemented in process through Procedure AP 184.
