**208.00 GENERATIVE ARTIFICIAL INTELLIGENCE (AI) USE IN
ACADEMIC SETTINGS**

To support academic freedom, promote discipline specific AI literacy, and provide students with clear expectations of AI use, the college will operate under a leveled framework for ethical AI use. Faculty are responsible for clearly communicating the appropriate level of AI use at the assignment or course level, subject to departmental requirements. Unless otherwise specified, the default level will be no generative AI use. At all levels, inappropriate or undocumented use of AI constitutes a violation of Policy 402- Academic Code of Conduct. AI should not replace the development or demonstration of student foundational knowledge. Students are expected to maintain appropriate documentation and demonstrate an independent understanding of their work.

This Policy is implemented through Procedure AP 208.

Adopted: August 24, 2026
